

	<h1>ENVIRONMENTAL POLICY</h1>	Rev.: 00 Date: 11/07/2008 Pag.: 1 of 1
---	-------------------------------	--

Our company supplies a varied range of die-cast products made of zamak and optionally painted or plated with nickel or zinc. The company currently maintains two plants, in Itziar and Eibar, with a total of 63 employees.

The excellent performance of the company in recent years is reflected in the high level of customer satisfaction.

We are conscious of our duty to harmonize economic development with environmental protection in order to guarantee the future sustainability of our activity and that of our surroundings. For that reason we are committed to fulfilling all currently applicable environmental legislation as well as other obligations we may ourselves acquire, making every effort to avoid pollution and to incorporate environmental awareness into the daily management of our organization, constantly improving our performance in this respect.

Since, like every human activity, our company produces an environmental impact, we are committed to identifying and assessing the main aspects of our activity that produce effects on the environment, training our employees on awareness of these same aspects so that their behavior in the workplace reflects our commitment, giving priority to waste generation and the use of raw materials.

One of our challenges is to achieve a continuous environmental improvement beyond mere observance of the applicable legislation. To this end we will define and review environmental objectives, aims and programs annually, in order to reduce our ecological footprint.

Our priority objective in the short term is to obtain Ekoscan Certification which, although not recognized outside the Basque Autonomous Community, the company sees as an important milestone on the way to achieving fully responsible environmental practice.

In the near future we will study the possibility of working towards the internationally recognized certification ISO 14001.

This Policy will be reviewed and modified as necessary to continually harmonize with the aims of the company. To this end we invite all parties in any way related to our organization to put forward their suggestions and advice so that we may continue to improve our performance.

Bruno Ribó
General Manager
